

## PRODUCTS FOR INCREASING THE PRODUCTIVITY OF SOILS & PLANTS

### soilBOOST

by CleanseAll

**soilBOOST** is a naturally based solution consisting of a very intense, broad diversity of beneficial microorganisms and biologically derived organic acids used to **augment the productive capability of troubled soils** in growing annual and permanent crops. The result is a soil profile able to produce better crop yields, greater nitrogen utilization and lower incidence of disease and contamination; soilBOOST inhibits the growth of pathogenic (disease bearing) microorganisms in the root zone.

### rhizoGUARD

by CleanseAll

**rhizoGUARD** introduces nature's bacteria into the soils surrounding a plant's root zone to **promote targeted improvement** in a plant's growth and development. rhizoGUARD works with root systems symbiotically (to a mutual advantage) to free up the soil nutrients for the plant's root system water and nutrient uptake, improving the plant's healthy growth and vitality.

### plantGUARD

by CleanseAll

**plantGUARD** uses helpful bacteria to **discourage the growth of undesirable microorganisms** in the soils supporting plant development. Conditioning soils with plantGUARD as part of the natural growing process promotes healthy nutrient management. The naturally occurring species in plantGUARD are selected for their high degree of microbial competitiveness – these good microbes essentially work to defeat potentially harmful microbes and subsequent infestation or contamination.

### cactusRAIN

by CleanseAll

**cactusRAIN** is composed of natural saponins found in many plants, especially certain desert plants (Yucca schidigera & Quillaja saponaria). cactusRAIN saponins lower soil surface tension, allowing more irrigation water to move into and through the layers of soil – the result is cactusRAIN **helps plant cells to absorb water and nutrients faster and easier**. This leads to vigorous growth of plants in environments facing the stresses of adverse growing conditions, especially with soil moisture.

### jungleRAIN

**jungleRAIN** is a vegetable based product formulated with citrus and other natural oils blended with pure Castile soap. Regular washes with jungleRAIN help to **provide more complete photosynthesis** and greater root zone absorption of water and nutrients, and **reduced conditions for infestation**. Vegetables and fruits can be safely harvested immediately after spraying.

### flowCLEANSE

by CleanseAll

**flowCLEANSE** keeps drip irrigation lines clean and free for predictable flow of water and nutrients delivered in irrigation systems. Using the latest advances in hydronium-based technology (non-corrosive Hydronium stabilized H904) positions **flowCLEANSE** as a **safer, more powerful alternative to potentially harmful corrosive acid-type line and well cleaners**. Clean lines, wells and other components of irrigation systems helps to promote more efficient and effective use of water and other supplements.

### soilPOWER

by CleanseAll

**soilPOWER's** organic, positive -charged mineral compounds dissolve (make soluble) a soils macro and micro nutrients to create a natural reaction for soluble nutrients to be sourced into a plant's root zone (rhizosphere). Because soilPOWER enhances fertilizer and supplement efficacy as well as buffers salt in the soil, it **works well in helping extremely problematic soil profiles**.

### KingFish

**kingFISH** is a unique fish meal and emulsion formula designed to replace chemical based fertilizers *To be released soon*

### PRODUCTS FOR MANAGING PRODUCTIVE QUALITY IN WATER & AIR

#### aqua Cleanse

by CleanseAll

**aqua CLEANSE** is a stabilized sodium peroxidase formula for replacing copper based materials. Its fast acting formula releases oxygen immediately into water, providing near instant benefit to bacteria. Aqua Cleanse is safe for use in most bodies of water.

#### Aquatic Cleanse & Aquatic Cleanse Plus

by CleanseAll

**Aquatic CLEANSE** is a liquid based probiotic designed for smaller bodies of water – from aquariums to small ponds – and where the control of algae and odors is problematic. Aquatic Cleanse converts organic waste in water into hydrogen and carbon dioxide. Aquatic Cleanse Plus is five (5) times stronger and used in larger tanks, ponds or salt water containers.

#### ALG-A-WAY (Lake Cleanse)

by CleanseAll

**Alg-A-Way** introduces a combination of probiotic bacteria for use in large lakes or water bodies. While Alg-A-Way will degrade organic waste its effect is also beneficial for grasses in situations where lakes source irrigation systems. Alg-A-Way will help keep lakes clean and healthy for wildlife and fish, and is not harmful when used in water bodies used for recreational benefit.

#### Sun Blocker

by CleanseAll

**sunBLOCKER** is a safe colorant used for large ponds and lakes. By reducing the intensity of photosynthesis, sunBLOCKER is able to enhance a water's blue color, without harming or jeopardizing recreational or other uses of the targeted body of water.

#### Sun Shade

by CleanseAll

**sunSHADE** is half the strength of sunBLOCKER and intended for use in smaller ponds and bodies of water where the reduction in the intensity of photosynthesis is sought to enhance a water's blue color, and without the consequences of harmful effects.

#### Anti Foam

by CleanseAll

**antiFOAM** safely eliminates unwanted foaming in lakes, ponds, streams and other contained bodies of water. Water treated with Anti-Foam may be used for irrigation and recreational use (swimming and other sports may be conducted during and following use of this product); water treated with Anti-Foam may NOT be used for direct human consumption..

#### Odor Cleanse

by CleanseAll

**Odor Cleanse** is formulated to degrade anaerobic conditions to methane, CO<sub>2</sub> and H<sub>2</sub>O. Odor Cleanse does not require special handling or regulatory oversight. It's safe yet powerful natural ingredients are ideal for dairies, waste water treatment and processing operations where odor control is problematic, costly and impacting surrounding environments.

#### Zymit

by CleanseAll

**Zymit** is a unique blend of new chemistry and combined with bacteria to not only eliminate odors but to degrade waste and paper in holding tanks, outhouses, portable toilets and any other waste systems with odor and accumulated deposit problems.

#### Odor Fresh

by CleanseAll

**odor FRESH** is a blend of natural, organic and mineral compounds formulated to react with and eliminate offensive odors in holding tanks, portable recirculating toilet systems and containers within operations aggregating foul smelling waste materials.

### Additional Industrial Type Products

See Products For Managing Industrial and Commercial Operations

### PRODUCTS FOR KEEPING SURFACES & SYSTEMS CLEAN & SAFE

#### s'oil Cleanse

by CleanseAll

s'oil CLEANSE is designed to clean and remediate oil and other hydrocarbon contaminations on floors, engines, rocks and soils. s'oil CLEANSE is ideal for cleaning various types of spills - fats, oil and greases (FOG). It's unique biological formula make s'oil CLEANSE safe and biodegradable – nature's microbes go to work immediately without producing harmful toxins.

#### CleanseAll One & CleanseAll One Concentrate

by CleanseAll

CLEANSEALL ONE is an all natural, non-toxic, bio-degradable, solvent-free cleaner. CleanseAll One degreasing capabilities make it ideal for cleaning surface areas impacted by grease, oil and everyday use in kitchens, garages, backyards and laundries. Use CLEANSEALL ONE to clean floors, wood, tile, vinyl, granite, plastic, painted surfaces, stainless steel and other metal surfaces. CLEANSEALL ONE Concentrate can be used at full strength or diluted up to 1 oz. per 10 ounces of water for general cleaning.

#### Drain Cleanse

by CleanseAll

Drain Cleanse is an all natural biological formula. The formula uses nature's own biological action in the form of billions of natural grease and grime eating microbes for eliminating organic drain line and grease accumulation, and accompanying odors. Drain Cleanse will help prevent FOG (Fat, Oil and Grease) from being discharged into the waste stream, which helps to dramatically reduce expensive grease trap cleaning and maintenance routines.

#### Septic Cleanse

by CleanseAll

Septic Cleanse is a special combination of microorganisms that work to keep septic systems clean and working properly.

#### Well Cleanse

by CleanseAll

Well Cleanse employs an innovative hydronium-based acid with a low pH safe for all metals (except galvanized). Well Cleanse cleans contaminated wells fouled from iron, bacteria or other minerals without removing pumps and operating equipment.

### Using Hydro-ionic Technology – *More Products on the Horizon*

Solutions using innovative hydronium-base and acid, yet safe to handle, and for replacing the need for Sulfuric Acid, Muriatic Acid, Sodium Hydroxide and other more corrosive treatments normally used in different types of processing operations.

### Additional Industrial Type Products

See Products For Managing Industrial and Commercial Operations

## PRODUCTS FOR MANAGING INDUSTRIAL & COMMERCIAL OPERATIONS

### Boiler Water Treatment

by CleanseAll

**Boiler Water Treatment** is designed for use as an internal treatment for the prevention of scale and corrosion in steam boilers having a high make-up water requirement, a low amount of steam returned as condensate, or in use as process boilers

### Steam Line Treatment

by CleanseAll

**Steam Line Treatment** is a neutralizing amine steam line application and may be fed directly from the drum to steam header or to a convenient location in the boiler system. This product may also be diluted with warm water into a day tank with a suitable mixer.

### Corrosion Inhibitor (open & closed loop)

by CleanseAll

**Corrosion Inhibitor – Molybdate Based** is a corrosion inhibitor designed to serve open recirculating systems, or hot and chilled water systems where oxygen may be a problem. This product will provide protection for all types of yellow metal and iron surfaces in cooling and heating systems and with minimal make-up water.

### Corrosion Inhibitor (closed loop only)

by CleanseAll

**Corrosion Inhibitor – Nitrite Based** is a single drum liquid formulation of borate nitrite to protect closed heating and chilled water systems from scale and corrosion.

### Closed Loop Cleaner

by CleanseAll

**Closed Loop Cleaner** is a liquid blend of special cleaners and buffers designed for cleaning mill scale, dirt and debris from closed loop systems.

### Tower Treatment & Tower Treatment Concentrate

by CleanseAll

**Tower Treatment** is an organic treatment for recirculating and cooling tower systems. The product formula combines organic phosphonates, polymeric dispersants and corrosion inhibitors for maximum effect. Proper use works to help prevent corrosion, buildup of scale and mineral deposits. Tower Treatment contains no phosphates, zinc or chromates and is designed for treating small to medium sized cooling systems.

### Cooling Tower Treatment

by CleanseAll

**Cooling Tower Treatment** aides in eliminating built-up scale, mineral deposits and sludge. Proper use helps to prevent corrosion and pitting of surfaces and to reduce accumulations of silt and mud in condenser tubes. Cooling Tower Treatment is a special blend of organic and inorganic phosphonates, Polymeric dispersants and corrosion inhibitor's. Designed to operate in hard waters or where an acid based product is desirable. Very concentrated product. For medium to large sized commercial towers.

### Cooling Tower Treatment – Low pH

by CleanseAll

**Cooling Tower Treatment – Low pH** aides in eliminating built-up scale, mineral deposits and sludge. Proper use helps to prevent corrosion and pitting of surfaces and to reduce accumulations of silt and mud in condenser tubes.

### Cooling Tower Treatment – Molybdate Base

by CleanseAll

**Cooling Tower Treatment – Molybdate Base** condenser water treatment does not use sodium chromate or zinc in its composition. The result is the prevention of corrosion, scale and the reduction of silt and mud accumulations in condenser tubes without the potentially serious pollution problems associated with such chemicals. This product contains a special anti-foulant additive that helps in eliminating built-up scale, mineral deposits and sludge. Proper use helps to prevent corrosion and pitting of surfaces and to reduce accumulations of silt and mud in condenser tubes.

### Cooling Tower Treatment – Unique Organic Blend

by CleanseAll

**Cooling Tower Treatment – Unique Organic Blend** is a scale, sludge, organic penetrant-dispersant and corrosion inhibitor for Cooling Water Systems. By acting as a strong crystal modifying agent and threshold inhibitor proper use of this product provides effective control over deposition of calcium and other metal salts. This product is also a very good corrosion inhibitor and organic penetrant due to its ability to penetrate a matrix of organic deposits.
